ASBESTOS CONSULTING SERVICES
BUILDING #2
UNFORESEEN CONDITIONS
19901 NORMANDIE AVENUE

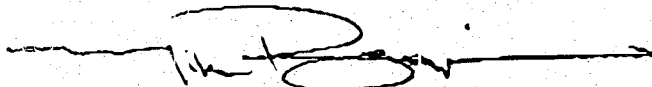

Introduction: This proposal on this day, presents the scope of services associated with "unforeseen conditions" and an estimated cost for providing additional asbestos consulting services to Boeing Realty Corporation, pursuant to the original Agreement for Professional Services between Boeing Realty Corporation and Environmental Solutions dated February 11, 2000, "Consulting Agreement". This proposal, when countersigned by Boeing Realty Corporation representative, shall constitute an agreement between Boeing Realty Corporation and Environmental Solutions with respect to the scope of additional services and fee schedules for providing consulting services collectively, the "Additional Services due to Unforeseen Conditions" for the hazardous material abatement in the selected areas of Building #2 at the above address, the "Project".

Scope of Work: The purpose of the work is to provide consulting services related to newly found asbestos materials and unforeseen conditions. We understand that the abatement includes the removal of friable asbestos-containing TSI from sections of the said building, as specified by the scope of work discussed by Tri-State & Boeing.

Fee Estimate: We have been informed that the associated abatement work can add up to seven additional shifts to the previously estimated time. We propose a sum of \$1,920 to accomplish the additional work days. This fee is based on 4 hr. shifts @ \$240/shift and includes all pertinent expenses, air samples and laboratory analysis and preparation of the final report.

If this proposal meets with your approval, please execute and return a copy to serve as our notice to proceed.
